State taking comments on rural broadband mapping

According to FCC reporting the white areas above are areas designated to have broadband Internet coverage with a 25 mbgd download speed and a 3 mbgd upload speed. As you can see, the map, using data cultivated in 2017, shows more than a good portion of Lee County’s rural areas “appear” to have that standard speed. The blue areas show where the 25/3 speed was not available during that time and it is designated as a “Targeted Service Area”. This map was released this week.

BY CHUCK VANDENBERG
PCC STAFF

LEE COUNTY – Expanding high speed broadband access to the more rural locations in Lee County may be an issue of investment, technology and even just Father Time.

But as with any utility’s in the United States, getting investments to extend services to the most rural areas takes those resources, but the initial work is increasing the discussion.

Several weeks ago Iowa’s U.S. Senators Charles Grassley and Joni Ernst sent letters to Federal Communications Commission Chairman Ajit Pai, that census block mapping doesn’t tell whole picture.

Health foundation pledges $1.5 million to P.O.R.T

BY FED COMM STAFF

WEST BURLINGTON – The GRHS-FMCH Community Health Foundation has pledged to provide up to $1.5 million to Promoting Outdoor Recreational Trails (P.O.R.T) of Fort Madison for the construction of a trail connecting to Rodeo Park in Fort Madison. The route will be determined after a survey is completed.

This announcement comes on the first anniversary of the affiliation agreement between Fort Madison Community Hospital (FMCH) and Great River Health System (GRHS). The GRHS-FMCH Community Health Foundation was created as part of the agreement to provide funding for projects or initiatives that help improve the health of communities served by the health system. Its board of directors consists of three members from each organization. The new foundation does not replace the FMCH Foundation.

Little pig escapes by hair on chinny chin

BY CHUCK VANDENBERG
PCC STAFF

FORT MADISON – Sandy Brown is probably the foremost advocate for animal care in this part of the state.

And despite the director of Fort Madison’s P.A.W. animal shelter having her hands more than full finding forever homes for wayward dogs and cats, she doesn’t have the heart to turn away anything, including a piglet that fell from a livestock trailer on July 19 on a Lee County highway.

The 21 lb. baby pig, may have been smarter than the rest of her truckmates, or was maybe just clumsy, but certainly was lucky as now, despite getting a little banged up, escaped a certain path to a mechanized butcher, and will now find a home free of the demise.

“Shirley” likes lettuce, bananas and apples. The piglet fell escaped from a livestock truck in Lee County and is now in search of sanctuary or family farm that will agree not to butcher the animal. Photo courtesy of P.A.W. Animal Shelter.

And Brown insists upon it. “Shirley” as she has been affectionately dubbed by P.A.W. volunteers is now in a back yard pen at a rescue state.

See RESCUE, page 2
Rescued pig must go to no-butcher private farm

Rescue - Continued from Page 1

Brown said. But she said the best plan, as hard as it sounds, if the animal just seems lost, to let Mother Nature take it's course.

"As cold-hearted as it sounds most of the time it's just best to let Mother Nature take it's course," Brown said. "And don't stand there and look at the animal, mom is watching somewhere just let it takes it's course."

Fundraiser planned

The shelter is also planning their first golf-outing fundraiser on Aug. 11. The four-person best shot is $60 per player and includes entree fee, greens fees and a cart. Some adoptable pets may be on the course during the event and cleaning supplies can be donated for the shelter. Call 319-528-6214 for more information.

P.O.R.T - Continued from Page 1

"Great River Health System’s vision is to empower people, transform lives and fulfill dreams," said Matt Wenzel, president and chief executive officer (CEO). "To do this, we must provide exceptional health care and invest in the communities our patients call home, giving them the tools necessary to live healthy lives."

Great River Health System consists of several entities. Besides Great River Medical Center and Fort Madison Community Hospital, it includes more than 25 clinics, three outpatient pharmacies, two medical equipment and supplies stores, and Universal Therapy Group, which joined the health system April 1. Having a shared vision will enable the health system to provide coordinated, comprehensive care.

"Our goal is to make southeast Iowa a better place to live for employees, residents and future residents. By collaborating with community partners like P.O.R.T., we can make it happen," said Jeremy Alexander, FMCH CEO, and Great River Health System Chief Financial Officer.

Construction of the connecting trail to Rodeo Park is expected to begin in September 2020.

"We are extremely grateful for this generous donation," said Rachel Benda, chair, P.O.R.T committee. "It has been our goal to connect our current P.O.R.T. trails to Rodeo Park. We never dreamed it would happen so soon."

P.O.R.T. of Fort Madison is a subcommittee of the Parks and Recreation Board of the City of Fort Madison. Its mission is to promote active living and improve recreational trails in Fort Madison and the surrounding area.

**Chrisman Named New VP of Technology Services**

WEST BURLINGTON - Southeastern Community College recently named Chuck Chrisman as its new Vice President of Technology Services.

Chrisman has been with SCC for over 25 years. As the Executive Director of Technology Services, he has worked on all aspects of distance learning, instructional technology, information technology and institutional research.

"Whether someone is accessing their email or teaching class with our virtual reality xSpaces, Chuck and his team are responsible for making it happen," explains Dr. Ash.

Chrisman was also a founding member of the Iowa Community College Online Consortium (ICCOC) in 1999 and served as its first director from 2000 through 2003. He continues to provide technical oversight for the Consortium, which shares online courses, staff, and resources among seven participating Iowa community colleges.

"The part of my job that I enjoy the most is watching our students succeed," Chrisman says. "In my new role, I look forward to collaborating with the SCC team to continue offering the best programs, services, and support for our students." SCC President Dr. Michael Ash recognizes that technology is critical in higher education:

"We have the latest technology in our classrooms, we offer online courses, and we will continue to keep up with the fast-paced changes in this realm," he says. Chrisman is pleased to accept his new role and reflects on why he enjoys his career.

"It is rewarding to witness students reaching their educational and career goals," he says. "I am lucky to work with people who are passionate about preparing students for the next phase of their lives."
**Fishing heats up as area waters cool down**

### Big Hollow Lake
Water is cooling off; temperatures are back down into the upper 70’s. Largemouth Bass - Fair: Look for the bass to get more active again with the cooler water. Bluegill - Fair: With the heat, switch to fishing early mornings and late evening. Concentrate your efforts around the brush piles near the upper end and the flooded timber near deep water at the lower end. Black Crappie - Slow: Look for crappies out in the trees and brush piles in 6 to 7 feet of water. The bite slowed some since last week, maybe because the bluegill bite is drawing more anglers. Channel Catfish - Good: Fish near the rocks on the dam jetties and island to catch some nice catfish.

### Iowa River (Columbus Junction to Mississippi River)
The Iowa River is falling at a good rate; keep this in mind if you are setting bank lines this weekend. Channel Catfish - Fair: Try: sink bait or grass frogs this time of year. Flathead Catfish - Fair: Flatheads are mostly done spawning and are starting to get back on the feed. Local ramps are still closed and water levels are still high from the flood. Use topwater lures around the flooded timber and submerged structure. Largemouth Bass - Fair to Good: Use rubber worms or spinnerbaits around the fishing jetties and along the face of the dam. Try also topwater lures in the mornings and evenings. Channel Catfish - Fair: Use nightcrawlers or chicken liver around the shorelines.

### Lake Belva Deer
Water temperatures are around 80 degrees. A green tint is in the water, but water clarity is improving. Largemouth Bass - Fair: Look for bass around the mounds in the deeper water at the upper end and around the rip-rap at the lower end of the lake. Early morning or late evening is best. Bluegill - Fair: Bluegills are out deep. Start out in 10 to 12 feet of water early in the morning. Channel Catfish - Fair: Most catfish have moved into deeper water; start along the old creek channel.

### Lake Darling
This morning (Aug. 1st) we finally dropped below 80 degrees (78). Still a green color to the water; need some rain to clear that up. Largemouth Bass - Fair: Bass are out around the rock piles and brush piles in 6-10 feet of water coming in shallower early in the morning before it gets hot. Bluegill - Fair: Most bluegills have moved off into deeper water (8-10 feet) around the rock piles and brush piles. Channel Catfish - Fair: Catfish have wrapped up the spawn. Try drift fishing with cut bait along the old creek channel in the lake. Black Crappie - Fair: Slow drift or troll over the habitat in 10 to 12 feet of water. Early morning or late evening is best.

### Lost Grove Lake
Largemouth Bass - Good: Anglers continue to catch bass; work them out along the edges of the weed beds and around the trees and brush piles in 4-6 feet of water using soft plastics. Late evening is best. Black Crappie - Fair: The bite slowed down a bit. Anglers continue to pick up crappies out around edges of the flooded timber in 8 to 10 feet of water. Try vertical jigging or using a slip bobber and minnow. Bluegill - Fair: The hot weather has put a quick end to the spawn. Look for bluegills around the deeper habitat now. Channel Catfish - Fair: The spawn is mostly over. Start working the areas below the flow under the causeway and along the creek channel.

### Skunk River (Coppock to Mississippi River)
Earlier in the week, the Skunk River was holding steady; it’s dropping once again. Channel Catfish - Good: Use grass frogs this time a year. Try also cut up shad and your favorite stink baits. For more information on the above lake, call the Lake Darling Fisheries Office at 319-694-2430.

### Cedar River (Cedar Rapids to Moscow River)
Channel Catfish - Good. Coralville Reservoir
The lake level is at normal summer pool of 683 feet. The boat dock is in at Mahahey Bridge ramp. Channel Catfish - Fair: Slow troll or drift cut bait in the channel. Diamond Lake
Channel Catfish - Good: Stink bait or chicken liver works best. Best bite is early and late in the day. Bluegill - Fair: Try: worms or small jigs in deeper brush. Black Crappie - Fair: Try deeper brush or drift the basin with jigs for suspended fish.

### Iowa Lake (Iowa County)
Bluegill - Fair: Some nice sized fish are being caught. Largemouth Bass - Slow: Black Crappie - Slow. Channel Catfish - Fair: Early and late in the day is best.

### Iowa River (Marshalltown to Coralville Lake)
Channel Catfish - Good: Frogs and stink bait work well as bait.

### Lake Macbride
Only outboards 10 hp or less may be operated on the lake. Water temperatures are in the low 80’s. Walleye - Fair: Troll in 8-10 feet of water along rock. Black Crappie - Slow. Wiper (Hybrid Striped Bass) - Fair: Sunset has been best. Look for schools feeding on the surface. Largemouth Bass - Fair: Try: fishing around the weed edges and shallow rock/weed. Channel Catfish - Fair. Bluegill - Fair: Target rock reefs in 8-10 feet of water or around shoreline rip-rap.

### PLEASANT CREEK LAKE
The main ramp and parking lot will be closed starting July 8 for repaving. It will most likely be closed for a couple months. Bluegill - Fair: Fish have been about 12-15 inches. Channel Catfish - Fair: Try: chicken livers or shrimp in about 12-15 feet of water.

### Sand Lake
Wiper (Hybrid Striped Bass) - Fair: Fish up to 2 pounds are being caught on the surface early in the mornings.

For more information, contact the Lake Macbride Fisheries Station at 319-624-3615.

### Hawthorn Lake
Largemouth Bass - Fair: Try: rubber worms or spinnerbaits around the rock jetties and the face of the dam. Use topwater lures early and late in the day in the same spots. Channel Catfish - Fair: Try: dead chickens or nightcrawlers in 4-8 feet of water. Bluegill - Fair: Use small jigs tipped with a waxworm. Sorting is needed for larger fish.

### Lake Miami
Bluegill - Fair: Try: small jigs fished around the fishing jetties and rip-rapped shorelines. Largemouth Bass - Good: Use rubber worms or spinnerbaits around the fishing jetties and along the face of the dam. Try also topwater lures in the mornings and evenings. Channel Catfish - Fair: Use: nightcrawlers or chicken liver around the shorelines.

### Lake Sugema
Largemouth Bass - Good: Use: topwater lures early and late in the day. Try also spinnerbaits or crankbaits around rip-rapped shorelines and the fishing jetties. Black Crappie - Fair: Use: jigs tipped with a minnow around the flooded timber and submerged structure. Keep moving until you find active fish. Bluegill - Fair: Try: small jigs in the open areas of the aquatic vegetation.

### Lake Wapello
Channel Catfish - Fair: Use: cut bait or dead chubs along the shore. Don’t fish too deep, most lakes have stratified. Largemouth Bass - Fair: Try: rubber worms or spinnerbaits around rock jetties and submerged cedar trees. Topwater lures in the same areas. Bluegill - Fair: Try small jigs along the shorelines and around the aquatic vegetation.
FULL-TIME DENTAL ASSISTANT

Mark C. Pothitakis Family Dentistry currently has a position available for a Full-Time Dental Assistant.
Complete an application or mail your resume to 1223 S. Gear Avenue, Eastman Plaza, Suite 302 West Burlington, IA 52655

Central Lee superintendent outlines bond impact

Dear Editor,

In early June, we officially announced our plans to go back to the polls on September 10, presenting a $12.9 million general obligation (GO) bond for the Central Lee Community School District. If approved, the bond would allow the district to upgrade safety and security features and address key facility needs.

One of the interesting aspects of this bond is that it would have a net-zero impact on property taxes. Naturally, this comes as a surprise to many in our community. After all, the last time the district proposed a bond, in April 2018, it would have increased property taxes $1.81 for every $1,000 of assessed property value. As you likely know, the April 2018 bond carried the majority but not the 60% required to begin the project.

How is it possible that the district is now proposing a bond with a net-zero tax impact?

The answer largely comes down to what’s known as the district’s “taxable valuation,” a number that consists of all residential, commercial, agricultural land and utilities. This year, the district experienced a 24 percent increase in its taxable valuation. The vast majority of this increase was due to the pipeline finally being taxed by the State of Iowa. Normally, the district experiences only a 2 to 3 percent increase in valuation each year.

This year’s significant increase in taxable valuation led to two developments: It allowed the district to generate $12.9 million in GO bonds. Back in April 2018, the district would have had a maximum capacity of $9.8 million.

It allowed the district property tax rate to absorb nearly $2.30 of the total $2.70 GO bond.

But where do the funds come from to cover the remaining 40 cents? Due to the district being able to fully fund its current slate of projects with a GO Bond, we can use sales tax revenue to reduce any remaining need to use property tax for the project and stabilize it in the future.

The district could have opted for a smaller GO bond and a sales tax bond. After reviewing interest rates of sales tax bonds, we discovered that we could reduce the total long-term cost of the project if we simply used a GO bond rather than a sales tax bond. This is because sales tax bonds typically come with a higher interest rate than GO bonds.

It is important to note that these numbers are all projections based on current pricing and information. It is important to note that these numbers are all projections based on current pricing and information. However, we do not anticipate significant fluctuations and we will leverage additional sales tax dollars to minimize the impact on local taxpayers as needed.

While the numbers can get complicated, the bottom line is that the district is in a unique position to address its facility needs without burdening local property taxpayers.

Sincerely,
Dr. Andy Crozier

Gov. says IowaWORKS job database has 80K listings

DES MOINES - Today, Gov. Kim Reynolds announced more than 80,000 jobs available on IowaWORKS.gov during a press conference at the Kelley Conference Room at Iowa Methodist Medical Center. Gov. Reynolds recognized UnityPoint Health as one of the employers with the most openings on IowaWORKS.gov with over 500 job postings.

“There are more than 80,000 job openings across the state of Iowa, and it underlines the strength of our labor market,” said Gov. Reynolds. “Companies, like UnityPoint Health, are looking for skilled workers in high-demand industries like health-care, information technology, advanced manufacturing, and more. Future Ready Iowa is playing a critical role in upskilling Iowans so they can access the cutting-edge careers available. Taken together, this growing and vibrant economy has created an environment for success.”

Iowa Workforce Development launched the employment services system in June. IowaWORKS.gov provides a variety of employment resources, tools and services to meet the needs of customers, employers and IowaWORKS staff members. Job postings are de-duplicated on the site and can be sorted by categories such as county, industry, or business.

“IowaWORKS.gov is a customer-focused system that helps employers and job seekers find and post employment opportunities around the state,” said Director Beth Townsend, Iowa Workforce Development. “Our recently modernized system provides more accurate information and we know now that our reporting is consistent with what we have heard around the state about what 2.4% unemployment looks like. As a web-based resource, the newly modernized IowaWORKS.gov allows us to have greater connections with our customers, anytime and anywhere.”

Lt. Gov. Adam Gregg and Iowa Workforce Development Director Beth Townsend joined Gov. Reynolds and the UnityPoint Health team.

For more information about the new IowaWORKS employment services system, visit www.IowaWORKS.gov.

Central Lee superintendent outlines bond impact

Dear Editor,

In early June, we officially announced our plans to go back to the polls on September 10, presenting a $12.9 million general obligation (GO) bond for the Central Lee Community School District. If approved, the bond would allow the district to upgrade safety and security features and address key facility needs.

One of the interesting aspects of this bond is that it would have a net-zero impact on property taxes. Naturally, this comes as a surprise to many in our community. After all, the last time the district proposed a bond, in April 2018, it would have increased property taxes $1.81 for every $1,000 of assessed property value. As you likely know, the April 2018 bond carried the majority but not the 60% required to begin the project.

How is it possible that the district is now proposing a bond with a net-zero tax impact?

The answer largely comes down to what’s known as the district’s “taxable valuation,” a number that consists of all residential, commercial, agricultural land and utilities. This year, the district experienced a 24 percent increase in its taxable valuation. The vast majority of this increase was due to the pipeline finally being taxed by the State of Iowa. Normally, the district experiences only a 2 to 3 percent increase in valuation each year.

This year’s significant increase in taxable valuation led to two developments: It allowed the district to generate $12.9 million in GO bonds. Back in April 2018, the district would have had a maximum capacity of $9.8 million.

It allowed the district property tax rate to absorb nearly $2.30 of the total $2.70 GO bond.

But where do the funds come from to cover the remaining 40 cents? Due to the district being able to fully fund its current slate of projects with a GO Bond, we can use sales tax revenue to reduce any remaining need to use property tax for the project and stabilize it in the future.

The district could have opted for a smaller GO bond and a sales tax bond. After reviewing interest rates of sales tax bonds, we discovered that we could reduce the total long-term cost of the project if we simply used a GO bond rather than a sales tax bond. This is because sales tax bonds typically come with a higher interest rate than GO bonds.

It is important to note that these numbers are all projections based on current pricing and information. It is important to note that these numbers are all projections based on current pricing and information. However, we do not anticipate significant fluctuations and we will leverage additional sales tax dollars to minimize the impact on local taxpayers as needed.

While the numbers can get complicated, the bottom line is that the district is in a unique position to address its facility needs without burdening local property taxpayers.

Sincerely,
Dr. Andy Crozier
Officials say fiber optics is the best option

**BROADBAND** - Continued from Page 1

mapping being currently used inaccurately reflects the availability of high speed Internet access in rural Iowa. The maps being used were from data cultivated in 2016, but a new map distributed by the Iowa Office of the Chief Information Officer (OCIO) this week is using data from 2017 and shows a slightly different picture.

According to FCC reporting the white areas above are areas designated to have broadband Internet coverage with a 25 mbps download speed and a 3 mbps upload speed. As you can tell, the map using data cultivated in 2017, shows more than a good portion of Lee County’s rural areas “appear” to have that standard speed. The blue areas show where the 25/3 speed was not available during that time and it is designated as a “Targeted Service Area”. This map was released this week.

Federal and state grants are available to help bridge the high speed broadband across rural America in the “Targeted Service Areas”, but local official say it isn’t just about applying and receiving.

A local tri-state advocacy group called Tri States Partners, originally formed about 20 years ago to look at regular infrastructure in northeast Missouri, western Illinois and southeast Iowa, is now taking up the rural broadband issue.

Data cultivated through census blocks by the FCC sets a standard broadband speed at 25 megabits/second download and 3 megabits/second upload. The TSAs are designated by those that do not have that 25/3 service speed.

Tim Fencl is the general manager and CEO of Danville Mutual Telephone Company. Danville Teleco offers broadband services in Lee County, Fencel, and Mt. Pleasant. Chamber Alliance Director Kristi Ray are working with the Summit group to help bring about conversations regarding the poor service in the area.

“When the government started talking about electric, water, and now the Internet – the more they talk about it the more it gets done. My personal take is seems to take 5 to 15 years for us to make real solid headway,” Fencl said.

Fencl said the real obstacle to bring reliable high-speed Internet to rural counties in Iowa and across America with current technology is the return on investment. “I will tell you when we started this a year and a half ago the maps were from 2014, and they say they’ve updated mapping to 2016, and we’re still not convinced its accurate. Sens. Ernst and Grassley were hearing of outdated so they questioned the maps and then the grants that were being awarded based on the maps. "That's phenomenal speed and we haven't even tapped into how much data we can send across fiber yet. I don't see anything in the next 5 to 15 years on the horizon that can do what fiber optics does," Fencl said. But he said rural America is not happy with the speed of the progress. Whenever it's starts to trigger no one gets it done fast enough. Price point is still high, but every year the technology is getting cheaper and cheaper," Fencl said.

"We’re not going it fast enough for everyone’s liking – certainly not mine. We’re leaving rural behind until we can get it there."

The main providers in Lee County’s rural areas are national providers Century Link and Dishnet, but other providers like Windstream, VSAT systems and Danville Teleco.

Ray said she’s been working with the Summit for the past year or so and has been involved in helping collect more accurate data on services and providers in the tri-state area.

“We meet with a number of providers and met with economic development groups and the economic development people are hearing we don’t have good broadband,” Ray said.

“It’s not fast enough and we have areas unserved and underserved. But the providers are telling us, totally understandably, they can’t offer fiber and broadband services when you have one home within miles of each other. They can’t find a way to make any money at it.”

Ray said the fortunate thing about Lee County is that providers, like Fencl’s company are very active at the state and federal levels in trying to open doors to help bring about a swifter solution. But she agreed with Fencl that providers are not going to provide fiber optic services to rural America until they can see a better return on investment.

In addition to the cost factor, she said the group started looking at the maps and saw they were very outdated so they questioned the maps and then the grants that were being awarded based on the maps. “I feel it’s getting a ton of conversation right now, but don’t know if we’re getting anything done. Our local providers are not the problem – but how do they make it feasible,” Ray said. “The chance of getting fiber to (rural) homes is slim to none, but can’t they find a way to a wireless market?”

Outside of the fiber optics Fencl said people are currently using satellite Internet services, which he said have a lower latency or data transmission speed. Some of the satellites use high orbital paths and some use lower orbital path.

“The number of satellites you would need to provide feasible service is astronomical. What do you do with them when they break? We’re talking about 1000s of satellites going across the sky.”

Fencl said he doesn’t think satellite technology is advanced far enough yet to make it a viable option and that research hasn’t determined just how much data can be sent across fiber optic cable, but right now data can move at close to 125,000 miles per second.

“That’s phenomenal speed and we haven’t even tapped into how much data we can send across fiber yet. I don’t see anything in the next 5 to 15 years on the horizon that can do what fiber optics does.”

However, he said there could be a balance struck between fiber and wireless connections.

“That tech is being looked at by people smarter than me and is a mix of some type of connected and wireless network. But again, how do you work that in a rural area where line of sight is so important,” he said. The OCIO is currently in a public comment window on mapping and anyone interested in commenting on the situation may do so at ocigrantsofia.gov.

Officials ask that you include any evidence that supports your claims regarding the current mapping.

Additional information on the FCC mapping and the OCIO’s involvement can be found at https://ocio.iowa.gov/broadband-availability-map-version-2.

“It goes much deeper than what we realized, “ Ray said. “We agree that the mapping is still not accurate. ”

But he said rural America is not happy with the speed of the progress. Whenever it’s starts to trigger no one gets it done fast enough. Price point is still high, but every year the technology is getting cheaper and cheaper,” Fencl said.

"We’re not going it fast enough for everyone’s liking – certainly not mine. We’re leaving rural behind until we can get it there."

This is a map of census block that was previously being used with the light blue areas showing 2 to 3 local ISPs and the darker blue areas indicating upwards of 6 – 8 ISPs in those areas that meet the 25/3 speed model. This was the map the prompted letters from Iowa’s senators to the FCC Chair.
OPEN HOUSE
August 4th & 5th
11am—3pm
Fort Madison, Iowa

P: 319-470-2540
FB: Green Oak Development—Fort Madison, IA
E: jillian@greenoakdevelopment-ia.com
For Sale Condominiums

**River View Condo**
- Farmhouse Design
- 3 Bedrooms—3 Full Baths—2 Car Garage
- Finished 9ft Walk-out Basement
- 2,900 sqft Finished
- 500 sqft Storage
- Price: $324,900

**Pond View Condo**
- Move in Ready
- 3—4 Bedrooms—3 Full Baths—2 Car Garage
- Finished Walk-out Basement
- 2,900 sqft Finished
- 500 sqft Storage
- Price: $336,000

**Woodland View Condo**
- Custom Design Inside
- 3 Bedrooms—3 Full Baths—2 Car Garage
- Finished Walk-out Basement
- 1,680 sqft Finished
- Price: $340,000

**Riverview Condo**
- Custom Design the Inside
- 3 Bedrooms—3 Full Baths—3 Car Garage
- Finished 9ft Walk-out Basement
- 2,800 sqft Finished
- 500 sqft Storage
- Price: $330,000

Phone: 319-470-2540   Email: jillian@greenoakdevelopment-ia.com

FB: Green Oak Development– Fort Madison, IA
- Finished Basement & Single Level Condominiums
- Landscape Additions - Pond, Fountain, Fire Pit, Seating Areas
  - 2-4 Bedrooms & 2-3 Car Garage Units
  - River, Forest, & Pond Views
- High-end Finishes—Quartz Counter Tops, Master Suites, Custom Wood Product Cabinetry
- Year Round Landscape & Building Maintenance Provided
- Zero Entry Private Patio & Deck, Large Windows, Energy Efficient
